 Tuek Thlar, Sen Sok, Phnom Penh

**Dear. Mr / Madam**

I'm applying for the UX/UI Design job. I've worked in this role for over a year, so I've learned a lot. I've gained knowledge from school and online sources, and I've had a helpful mentor who's a senior UX/UI Designer. I've also had the opportunity to be part of several projects that have not only improved my skills but have also made me a strong fit for this job.

In those projects, I have experience with tasks: like User research, User flows, Design System, Wireframe, Prototype, User interface, Icon Design, Illustrator Design, Create Mockup, Graphics Design, and some 3d Design, I have successfully completed these tasks during my dateline.

I'm excited about the chance to work at your company because I think it's the right place for me to learn and grow. I'm ready to work hard and bring my design skills to your team. I'm available for an interview whenever you prefer. Thanks for considering my application, and I'm looking forward to hearing from you soon.

Sincerely,

**NEB CHANVANDA**

# NEB CHANVANDA

**UX/UI DESIGNER**
